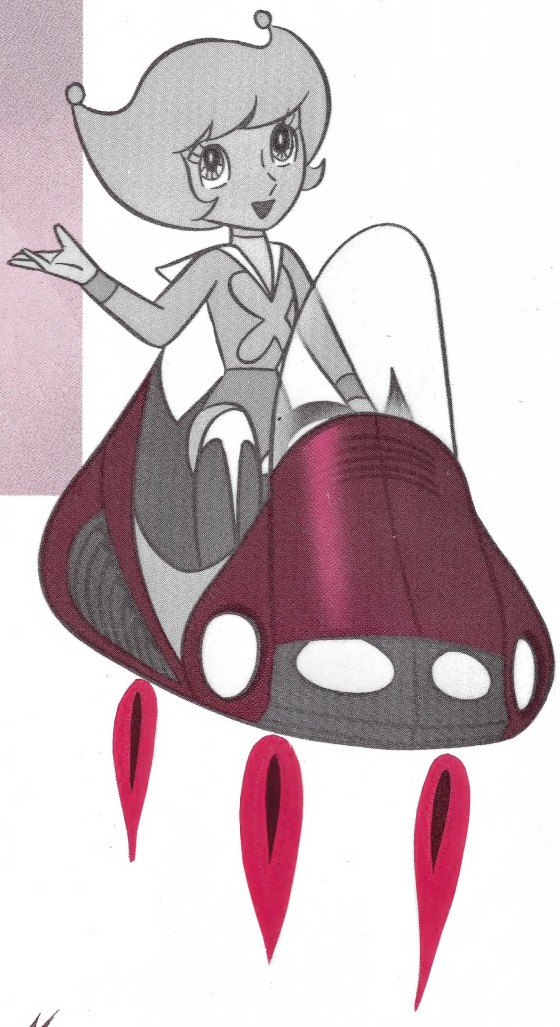
TOEI TOP IN ANIMATION!



THE STORY: (30 minutes TV series–color–)

It is 2015 A.D. Dr. Yamanoue, the Secretary of the Science Ministry, is an authority in robot engineering. And he devotes himself assembling the Android robot on an artificial island. Completing it. he intends to live together with him as his own son. But the robot has a deficiency in his electric brain. He comes to the conclusion that Dr. Kawashimo's help is essetial to correct his defective brain. Although they are friends, they are rivals not only in private life but also in scientific study. Dr. Yamanoue is very jingoistic and only thinks of the robot as one of his strategic arms. On the contrary, Dr. Kawashimo is a pacifist and devotes his affection to robots.

Dr. Kawashimo hurries to the island on request of Dr. Yamanoue, taking his pretty young daughter Miri with him. Dr. Kawashimo sometimes advises Dr. Yamanoue that he should provide tears and weakness besides courage and strength to Android if he intends to make Android a robot like common men.

On the contrary, Dr. Yamanoue believes that a robot should be only fearless and strong. Arriving on the island, Dr. Kawashimo sets the electric brain into Jet Mars, a robot boy. Thus Mars comes into the world. Everything is new to Mars and he doesn't know what is good or bad. On the next day he lifts Dr. Kawashima and Miri up onto the building. The more Miri fears, the more Mars frightens her. But when he sees a glint of moisture in Miri's eyes, he has a mysterious feeling in his mind. Then he asks Dr. Yamanoue what it is. He is taught that it is a tear a weak girl sheds, but, a strong man never does.

Dr. Yamanoue has been a thunderbolt strike. Fainton's electric brain is put out of order. So Fainton goes-on a wild rampage and the island is plunged into a crisis. When the seawater runs into the facilities from the big hole made by Fainton, only Mars stands in amazement and is quite at a loss what to do Just then Miri exhibits her ultraability and covers the big hole. Led by her, Mars also carries a sheet of iron and makes repairs. At last they rescue Dr. Yamanoue and Dr. Kawashimo from being washed by seawater. Miri is the robot made by Dr. Kawashimo. Mars learns how to cry and learns how to perform a kind deed.

(26 episodes or over)
